

Casita de Juana Guide

The things you will do most often, step by step. Everything works from a phone or a computer.

[Open the site](#)

1. Signing in and changing language

Sign in with your email and password. At the top right, **ES / EN** changes the language and **USD / DOP** switches between dollars and pesos.

To change your password, open **Account** in the menu.

2. Seeing what is new

The first screen, **Dashboard**, has a **What's new** box. It lists what tenants did: maintenance requests, messages, payment proofs and Edenorte bills. Tap a line to open it. When you are done, tap **Mark all as seen**.

The site does not send emails. Check the Dashboard from time to time.

3. Inviting a tenant

1. Open **Tenants & Units** in the menu.
2. Tap **Invite a tenant** on the empty apartment.
3. Enter the name, monthly rent, due day and start date.
4. The site makes a link. Copy it and send it to the tenant on WhatsApp. With that link they create their own password.

4. Recording a payment

1. Open **Tenants & Units** and tap the tenant's name.
2. Tap **Record payment**.
3. Enter the amount, the date and how they paid (cash, bank transfer, Zelle, PayPal).
4. To send the payment to one specific charge, such as October rent, pick it in **Apply to**. If you pick nothing, it goes to the oldest charge.

The same page shows every charge, every payment and what is still owed on each line.

5. Approving a tenant's payment proof

Tenants can upload a photo or screenshot of their payment. It does **not** change their balance until you approve it.

1. A yellow notice appears on the Dashboard. Tap **Review**.
2. Look at the photo. Fix the amount, date or charge if needed.
3. Tap approve to post the payment, or reject if it is not right.

6. Adjusting a balance

If a tenant's balance does not match your records, open their page and tap **Adjust balance**. Enter the total they owe and how much of it is overdue. The site makes the needed lines, and you can raise or lower the balance.

7. Electricity, Edenorte, maintenance and notices

- **Electricity:** enter each apartment's meter reading, with a photo. The site works out the charge.
- **Edenorte:** save your customer number and log each month's bill (kWh and amount). You get usage charts. The site never stores your Edenorte password.
- **A tenant's own Edenorte:** only you decide. On the tenant's page, under **Own Edenorte account**, tap **Allow** if they have their own contract. Without that, they do not see the option.
- **Maintenance:** requests arrive here. Change the status (open, in progress, resolved) and reply in the same thread.
- **Notice Board:** write a notice and every tenant sees it. **Document Vault** keeps contracts and rules. **Emergency Contacts** keeps the plumber, electrician and others.

If something does not work or a screen is unclear, send a screenshot on WhatsApp to whoever set up the site.
